# KYOBO REALCO SERVICE

Smart Solutions for Property Management

Kyobo Realco's multidisciplinary specialists work as one team under a unified strategy, delivering tailored solutions through a structured management framework aligned to each asset's condition and objectives. Through this, we maximize the utility of customer assets and generate stable, sustainable value, establishing ourselves as a trusted partner growing alongside our clients across the entire real estate spectrum.

Kyobo Realco's specialists in each field collaborate based on a single asset strategy to execute comprehensive real estate management solutions.

# VALUE GROWTH MARKETING

Strategic Marketing for Asset Value Enhancement

Kyobo Realco ensures the stable management of both the physical condition and operational performance of assets, supported by our deep expertise and systematic management framework. Simultaneously, we implement strategic marketing initiatives including leasing strategies, tenant mix optimization, and market positioning to drive asset value enhancement, while continuously elevating customer experience and satisfaction across our entire real estate service spectrum. This accumulation of specialized management and experience strengthens client trust and bolsters asset utility and market competitiveness, ultimately resulting in stable and sustainable long-term value appreciation.

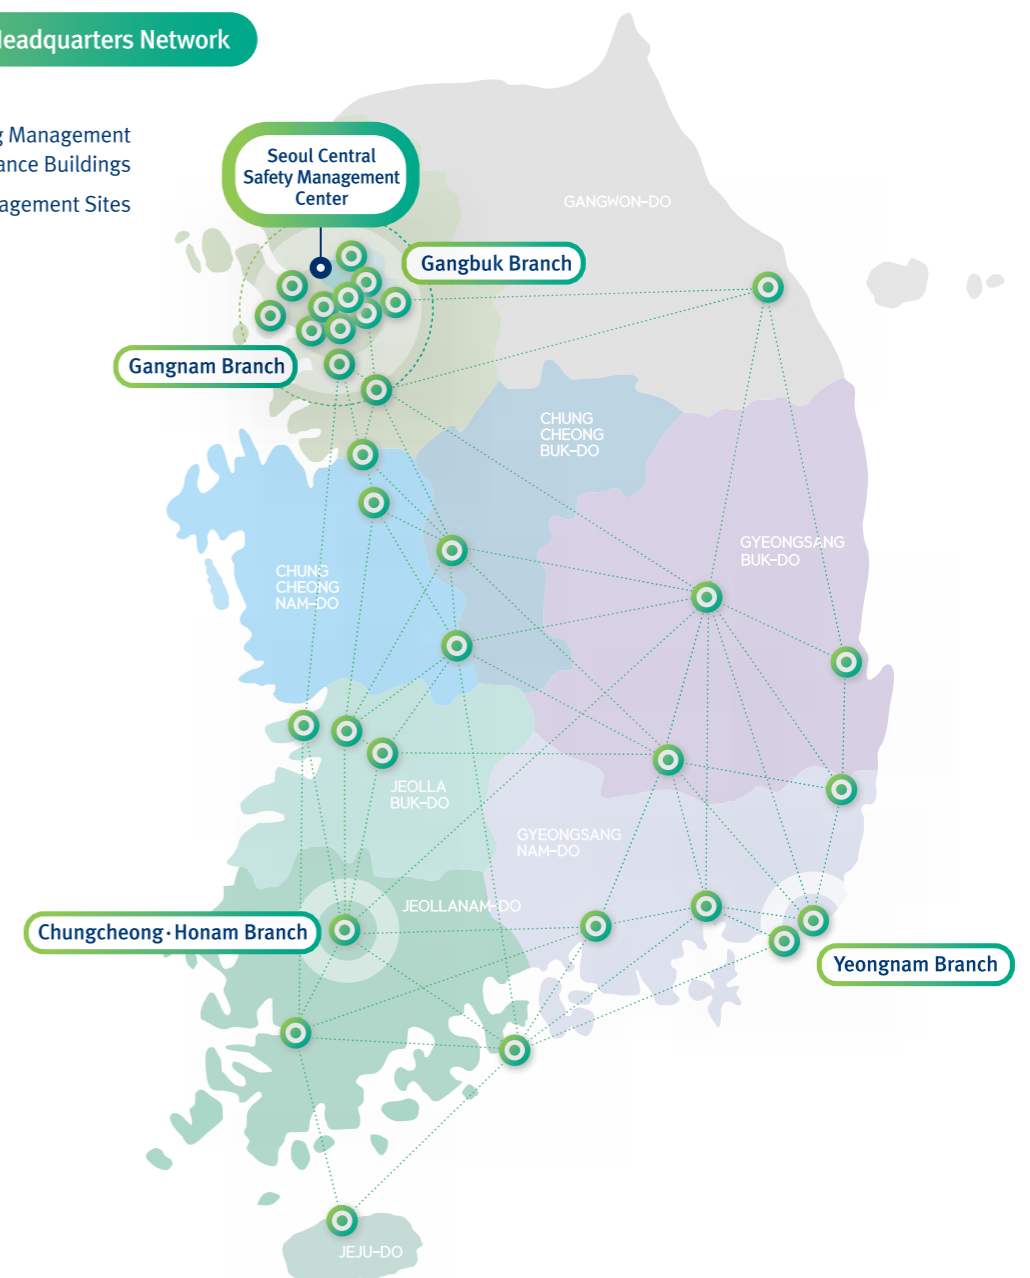

# KYOBO REALCO NETWORK

Asset Management Perfected through a Nationwide Network

Headquartered in Seoul, Kyobo Realco operates a nationwide management platform through four regional branches Gangbuk, Gangnam, Yeongnam, and Chungcheong, Honam and the Seoul Central Safety Management Center. This network enables responsive, site-specific management reflecting local market dynamics and individual asset profiles, while maintaining consistent standards and stable operations across all locations.

## Nationwide Regional Headquarters Network

- Operation and Leasing Management of 37 Kyobo Life Insurance Buildings  
 Operation of 140 Management Sites Nationwide

# REAL ESTATE EXPERTS

Real Estate Services Defined by Expertise and Experience

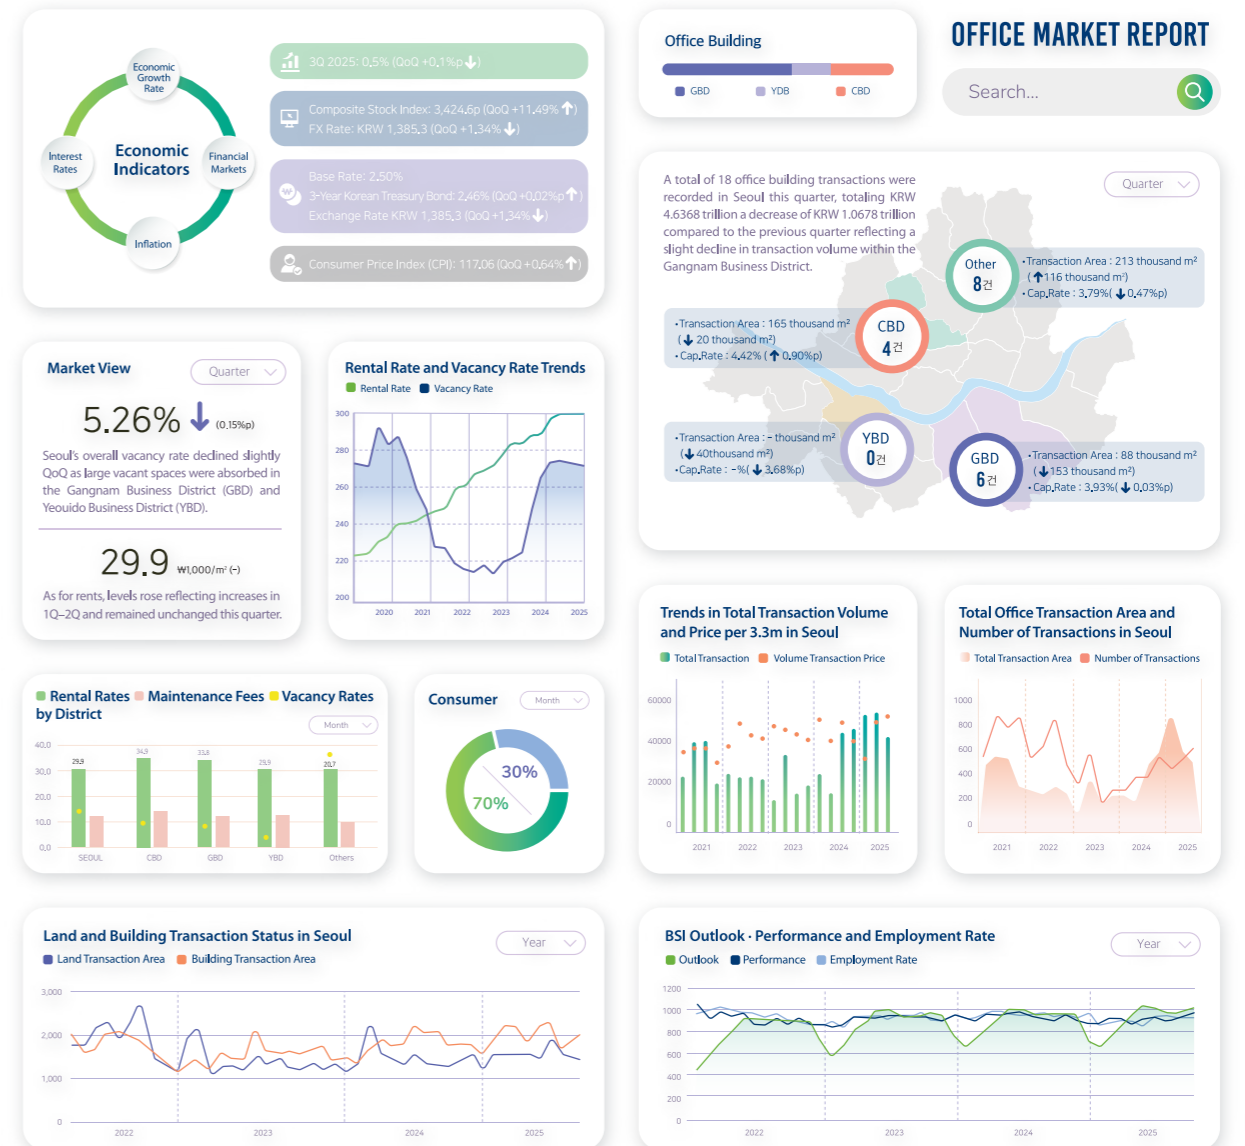

Kyobo Realco delivers real estate services through the integrated capabilities of specialist teams and extensive field experience. Our experts in asset management, leasing and market strategy, facility engineering, and safety & energy work together to provide end-to-end oversight across the asset lifecycle from operations to value enhancement, ensuring stable performance and long-term, sustainable value creation.

# OFFICE MARKET REPORT

Office Market Report Based on a Nationwide Network

Kyobo Realco performs multi-dimensional analysis of real estate market trends, leveraging field data and diverse analytics accumulated through its nationwide network. These market insights are integrated into our leasing, operational, and value-enhancement strategies, enabling more rational and informed decision-making for our clients.

# KYOBO REALCO HISTORY

## Kyobo Realco Company History

Founded in 1979, Kyobo Realco began with facility management (FM) and has since expanded its business into the entire real estate spectrum, including asset management, development, investment advisory, eco-friendly/safety management, and renewable energy. Based on continuous innovation and client-centric management, we create stable and sustainable future value together with our clients.

# KYOBO REALCO IDENTITY

# REAL ESTATE CONSULTING

## Strategic Consulting Solutions for Enhancing Customer Asset Value

Beyond mere advisory, we provide differentiated and optimal solutions across the entire real estate asset lifecycle from development to acquisition, operation, and disposal based on years of accumulated market data and practical experience aligned with each client's unique objectives and direction. We serve as your ultimate strategic partner, maximizing satisfaction by delivering excellence at every stage.

- 1 Investment Advisory
- 2 Lease Consulting
- 3 Retail Consulting

### PRIME GRADE

Redefining the Value of Core Assets in Sangam DMC through Strategic Acquisition and Disposition Advisory

Sangam DMC Prugio City S-City 94,469 m<sup>2</sup>  
OBD | Acquisition & Disposition Consulting

## 1 Investment Advisory

We conduct in-depth analysis of investment environments by leveraging a systematic database built through asset management and regular, asset-centric market research. Based on these insights, we establish strategic investment plans and propose optimal structures tailored to client needs. Furthermore, we deliver customized advisory services that integrate market trends and risk factors to secure stability and profitability simultaneously.

### Acquisition & Disposal Consulting

**Providing stable, feasible, and optimal acquisition and disposal consulting.**

We execute the entire transaction process, from identifying investors and buyers to Valuation, Deal Structuring, Negotiation, and Closing. We propose actionable disposition strategies and optimal transaction terms and plans that reflect asset characteristics and market conditions.

### Investment Attraction & Investment Strategy Consulting

**Capital Advisory combining capital raising and investment structure design.**

By leveraging a strategic investor network based on corporate headquarters demand, we attract common and preferred stock investors for asset acquisitions and design investment structures.

### Highest and Best Use (HBU) Analysis for Corporate Real Estate

**Proposing asset value maximization strategies based on portfolio analysis techniques.**

We provide mid-to-long-term asset management strategies by comprehensively analyzing corporate-owned assets from legal, physical, and economic perspectives to establish "Highest and Best Use" plans (disposal, holding, or development) for each asset.

### Market Due Diligence Reports

**Providing insights for investment and development decision-making.**

Based on research data and market information accumulated through our nationwide network, we analyze market environments by sector and region to provide insights for investment and development decision-making.

### Development Project Solutions

**Multi-dimensional development reviews for optimal land use.**

By three-dimensionally analyzing development concepts and conditions—the core of any project—we present optimal investment and development solutions that minimize potential risks and maximize feasibility.

# REAL ESTATE CONSULTING

## 2 Leasing Consulting

We provide services based on Kyobo Realco's credibility and market analysis utilizing specialized networks and building-tenant databases of major districts. Through our one-stop integrated solution, we provide comprehensive support for the entire process, including property search and contract advisory, as well as interior design, construction, and relocation management.

### PRIME GRADE

Providing Investment, Leasing Management (LM), Property & Facility Management (PFM), Comprehensive Services

Pine Avenue Bldg. A, B 130,000㎡  
CBD I Property Management PM, FM, Consulting

**Landlord Advisory** **Vacancy Resolution and Profit Strengthening** : We resolve vacancies early and create stable cash flow by attracting Blue-chip Tenants through targeted marketing.  
**Enhancing Asset Competitiveness** : We strengthen the building's market competitiveness through strategic Tenant Mix optimization and the establishment of optimal lease terms.

**Tenant Advisory** **Space Strategy Establishment** : We provide location analysis and office layout guides optimized for the company's business characteristics and personnel composition.  
**Occupancy Cost Optimization** : We reduce leasing expenses and secure a stable occupancy environment through professional lease term negotiations (Rent Free, Fit-out, etc.).

## 3 Retail Consulting

We provide specialized services that increase the profitability and operational competitiveness of commercial facilities by analyzing changing consumption trends and commercial district environments. We maximize the value of retail assets through strategic approaches to leasing, MD, and overall operations.

### Retail Leasing Consulting

By establishing leasing strategies that consider the characteristics of commercial retail spaces and market conditions, we provide stable profit structures for landlords and optimal locations/conditions for tenants. We support the entire process from lease term negotiation to contract execution.

### Retail MD Planning Consulting

We establish MD strategies based on commercial district, consumer, and competitive environment analysis for new developments and renewed commercial facilities. We strengthen visitor attraction and spatial competitiveness through category composition and brand combinations suited to the facility's character.

### Retail Anchor Pre-Leasing Consulting

For assets before completion or assets under acquisition review, we establish proactive anchor tenant attraction strategies considering asset value and business objectives. We simultaneously secure leasing stability and asset competitiveness through anchor tenant composition and resolving vacancies in critical areas.

# NEW RENEWABLE ENERGY

Energy Solutions Embodying Eco-friendly Value and Efficiency

Renewable energy, a future growth engine, prevents environmental problems and creates a pleasant society. We provide comprehensive solutions ranging from energy project development to the operation of solar, wind power, and more.

# PHYSICAL DUE DILIGENCE

## Comprehensive Building Diagnosis for Investment Decision-making

The purpose is to provide data for setting optimal asset management plans for investors' value judgment through objective due diligence based on facts—such as the building's current status, legal compliance, and physical condition—leveraging professional technical expertise (architecture, electricity, machinery, fire protection, and moving equipment), predicting future potential risks, identifying improvement plans, and estimating improvement costs (Capital and Operating Expenditures/CAPEX & OPEX).

### Real Estate Technical Due Diligence and Comprehensive Diagnosis of Asset Management Plans

To enable rational choices during real estate transactions and operations, we provide objective operating standards, including the building's physical condition, risk prediction, improvement plans, and costs.

# MECHANICAL EQUIPMENTS PERFORMANCE INSPECTION

We maintain mechanical equipment performance at its initial level and propose performance improvement plans to prevent accidents and minimize energy loss, thereby securing customer safety and equipment performance.

Inspections at least once a year for buildings with a total floor area of 10,000 m<sup>2</sup> or more.

## Types of Physical Due Diligence

### Newly Constructed Buildings

We focus on identifying discrepancies between the design documents and actual construction, incomplete items, and defects at the time of completion.

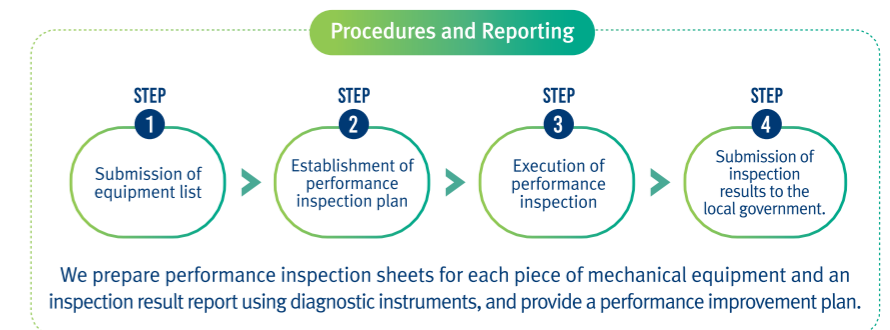

### Existing Buildings

We focus on inspecting buildings and facilities under management and operation, physical abnormalities, service life management, and legal compliance.

## Equipment Subject to Inspection

Chillers, absorption chillers, cooling towers, boilers, heat exchangers, expansion tanks, pumps, thermal storage tanks, renewable energy equipment, precision air conditioners, package air conditioners, HVAC systems, ventilation systems, plumbing fixtures, water supply, domestic hot water, wastewater and sewage systems, venting, stormwater drainage, sewage treatment, water reuse, piping, ductwork, insulation, automatic controls, acoustic treatment, vibration isolation, and seismic systems, etc.
